

Remote CO2 concentration with Ethernet interface and two relays

code: H5521

CO2 level transmitter with two output relays.

The CO₂ measurement is based on a 2-source, 2-beam process. CO₂ measurement with long-term stability is guaranteed thanks to the proven non-dispersive infrared (NDIR) CO₂ measurement cell. The unique patented auto-calibration procedure compensates for aging of the infrared source and guarantees high reliability, long term stability and eliminates the need of periodical recalibration in the field.

The device is supplied with CO₂ probe with 1m cable. Cable lengths 2 or 4 meters available optionally.

The CO₂ concentration is shown on the display or signaled by a color LED.
