

Multilogger - thermo hygro meter with 2 MiniDIN and 2 Thermocouple inputs

code: M1220

Universal datalogger with 4 inputs. Two inputs for temperature-humidity probes and two inputs for thermocouples K, J, S, B, T, N.

Multilogger can be installed permanently to Ethernet network or work as portable device.

Included is traceable calibration certificate in accordance with EN ISO/IEC17025.

The Multilogger is a battery operated datalogger capable of measuring and recording sensor and electrical values through its Inputs.

Data logger can be connected to Ethernet. Then measured values can be viewed on a web browser, as well as stored and downloaded for later analysis.
