

## Temperature Transducer Pt1000 -50°C to +50°C/ 4 to 20 mA

code: P4191

Temperature transducer for Pt1000 sensors. Outdoor, indoor use.  
For external Pt1000 temperature probe.

### Technical data

|  |                               |
|--|-------------------------------|
| TEMPERATURE SENSOR - external probe Pt1000 |                               |
| Measuring range                            | -50 to +50 °C                 |
| Accuracy                                   | ±0.4 °C                       |
| Resolution                                 | 0,3 °C                        |
| GENERAL TECHNICAL DATA                     |                               |
| Operating temperature                      | -30 to +80 °C                 |
| Channels                                   | 1x external temperature probe |
| Output                                     | 4-20 mA                       |
| Power                                      | 9-30 Vdc, typically 24 V      |
| Protection class                           | IP65                          |
| Dimensions                                 | 88,5 x 148 x 39,5 mm          |
| Weight                                     | approx. 125 g                 |
| Warranty                                   | 3 years                       |
