

## Temperature transmitter with RS232 interface

code: T4311

Temperature transmitter for Pt1000/3850ppm sensor is built in a durable watertight case. Degrees Celsius and Fahrenheit are user selectable. Large dual line LCD is an advantage. Display is possible to switch off.

### Technical data

|  |   |
|--|---|
| TEMPERATURE SENSOR - external probe Pt1000 |   |
| Measuring range                            | -200 to +600 °C                                   |
| Accuracy                                   | ±0.2°C (without temperature probe)                |
| Resolution                                 | 0.1 °C  |
| GENERAL TECHNICAL DATA                     |   |
| Operating temperature                      | -30 to +80 °C                                     |
| Channels                                   | 1x external temperature probe                     |
| Output                                     | RS232   |
| Available temperature units                | degrees Celsius, degrees Fahrenheit               |
| Communication protocol                     | ModBus RTU and Advantech ADAM compatible protocol |
| Power                                      | 9 to 30 Vdc                                       |
| Protection class                           | IP65  |
| Dimensions                                 | 88,5 x 117 x 39,5 mm                              |
| Weight                                     | approx. 145 g                                     |
| Warranty                                   | 3 years   |
