

Dual channel temperature data logger for one external Pt1000 probe with internal temperature sensor

code: U0122

Datalogger is designed to record temperature from one external Pt1000 probe and internal temperature sensor.

The recording is performed in a non-volatile electronic memory. The data can be transferred to a PC via USB-C.

In case of exceeded set limits alarms are indicated by LED, LCD and acoustically by built-in beeper.

The device **includes Traceable calibration certificate** with declared metrological traceability of etalons is based on requirements of **EN ISO/IEC 17025 standard**.
