# COMET Database software
Storage place for all COMET devices

COMET product users have a data collection solution that consolidates information in one central location. This software, based on MS SQL, can be installed on a customer's server or personal computer.

- 24-hour supervision
- Unlimited data storage
- Simple and clear access to your measured values
- A single repository for all COMET devices
- Alarm SMS texts and emails
- Acoustic and visual alarm signals

1. Choose the channels whose data you want to view.
2. Select the interval for data display.
3. Displayed data in table or chart view.
